## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-23 and 32-38, drawn to a method and an apparatus for aligning and fixing an optical fiber relative to an optical source, classified in class 385, subclass 52.

Group II, claims 24-31, 39 and 40, drawn to a method and an apparatus for supporting and aligning an optical fiber relative to an optical source, classified in class 385, subclass 51.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: groups I and II have different functions, since group I is directed to a method and an apparatus for aligning and fixing an optical fiber relative to an optical source; whereas, group II is directed to a method and an apparatus for supporting and aligning an optical fiber relative to an optical source.

Art Unit: 2874

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
